YOUNG EVERGREENS FOR 1960

\$1.95 per 10

Approx. 6"

\$18.00 per 100

Heavily rooted choice Evergreens. Not less than 10 of each variety.

Orders of \$3.90 or over postpaid — orders under \$3.90 add 25c.

The following may be planted from approximately May 1 to June 30 —

we do not recommend Fall planting at this age.

Taxus cuspidata — Japanese Yew. The old reliable spreading form which may be used in foundation planting or on the margin of evergreen borders.

Taxus c. capitata — Upright Yew. Compact pyramidal form which develops into a beautiful specimen or may be sheared as the choicest of hedges.

Taxus c. nana — Dwarf Japanese Yew. Slow-growing spreading form. Ideal for limited areas, and low hedges.

Taxus c. stricta — Dwarf Edging Yew. Best hardy evergreen edging plant.

Taxus media — Spreading Yew. Vigorous spreading type. Deep green needles.

Taxus m. hatfieldi — Hatfield Yew. Upright, compact, rich green needles. Ideal as specimens or for hedges.

Taxus m. hicksi — Hicks Yew. Narrow, upright, dark green needles, red berries. Beautiful hedge plant.

Taxus m. pyramidalis — Pyramid Yew. Beautiful new dense, pyramidal form.

Buxus m. koreana — Korean Boxwood. The only hardy boxwood for northern gardens.

Ilex c. convexa — Japanese Box Holly. Shiny boxwood-like leaves. Very hardy.

The following may be planted from April 15 to June 30 and September 1 to October 15

TWO-YEAR-OLD STOCK — BED GROWN

Same Varieties as Preceding List

THREE-YEAR-OLD STOCK — BED GROWN

70c Each \$5.90 per 10

Approx. 8" — Any Number of Plants May Be Ordered

Taxus m. hatfieldi — Hatfield Yew

Taxus media — Spreading Yew

Ilex c. convexa — Japanese Box Holly

FOUR-YEAR-OLD MATURED STOCK

\$1.45 Each \$13.50 per 10

Approx. 10" — Any Number May Be Ordered

Same Varieties as Above

FIVE-YEAR-OLD MATURED STOCK

\$1.95 Each \$18.00 per 10

Approx. 12" — Any Number May Be Ordered

Same Varieties as Three-year-old

All three, four and five-year-old stock has been carefully pruned and transplanted to produce bushy plants.

Same cultural care as younger stock except space the plants 10" apart, and they do not require shading.

OTHER CHOICE ITEMS

Grown in 3" Pots with Ball of Soil for Easy Transplanting

\$2.50 per 5 \$4.50 per 10

Minimum Order — 5 Plants. Orders less than \$4.50, add 25c.

All orders \$4.50 or above — Postpaid.

Azalea hinodigiri — Best Red Azalea. Compact, evergreen, free flowering. Must have sheltered location north of Philadelphia.

Azalea ledifolia alba — large flowered white.

Pieris japonica — Mt. Andromeda. Early white flowers, evergreen.

All of the above varieties have withstood temperatures of -10° F.

THE NEW GABLE HYBRID AZALEAS

This race of super-hardy Azaleas is the talk of the horticultural world! We have developed good stock of these fine varieties.

Grown in 3 inch pots with a ball of well developed roots for easy transplanting. Packing is done in an expert manner by experienced personnel.

75c Each \$6.50 per 10
of same variety

Rosebud — Unquestionably the best double pink evergreen hardy azalea. Very dwarf and compact.

Rose Greeley — White, large flowered and the hardiest white azalea.

Herbert — Dark crimson — purple. Rich evergreen foliage.

Lorna — Beautiful deep pink. Fully double flowers.

Complete collection of above \$2.75

KAEMPFERI HYBRIDS

A race noted for its brilliant colors like its parent the Torch Azalea. We have selected the best varieties for color, vigor and hardiness.

75c Each **\$6.50 per 10
of same variety**

Fedora — Salmon rose, exceptionally large flowers.

Othello — Claret rose, very vigorous.

VUYKIANA AZALEAS

A new hardy race of very large flowered Japanese Azaleas. All bloom late midseason and are evergreen.

Johann Strauss — Single, rose flowers, blotched.

Schubert — Single, phlox rose.

Mozart — Single, fuchine pink.

Wilhelmina Vuyk — Single, white with chartreuse blotch.

OUTSTANDING HARDY HYBRID RHODODENDRONS

These Rhododendrons are classified by Horticultural experts as "The Aristocrats of the Garden." We offer these plants to the public at the lowest price ever quoted for such choice varieties.

Do not confuse hybrid seedlings that have flower colors unknown, but usually a shade of muddy purple requiring 10 to 20 years to flower, with these vigorous clear-colored, well-rooted hybrids, grown from cuttings which will flower in three to four years.

Order the following top hybrids—time and weather tested—all having withstood temperatures of 10° below 0°.

GROUP A

Album grandiflorum — the best white Rhododendron with large flower trusses.

Roseum elegans — a beautiful orchid pink color. Most popular because of its bushy compact habit of growth and deep green foliage.

GROUP B

Mrs. Charles Sargent — Bright rosy pink in color with flower trusses 7" across and 6" high.

Dr. Dresselhuys — a brilliant early compact red. We consider this hybrid the best early red.

Ignatius Sargent — a vigorous growing Rhododendron with regal wine red flowers.

Caracticus — Tall growing with pyramid trusses of lovely red flowers.

All our Rhododendrons are grown for a season in 3½" pots to insure a ball of roots for easy transplanting. **Cultural directions** are the same as listed for Azaleas and Pieris on the back of folder.

HOLLY

The homeowner has discovered the year 'round beauty Holly plants add to his landscape, and the thrill of growing his own Christmas greens and berries.

We offer, for the first time, hardy strains which have withstood the rugged temperatures of Boston, Mass. for over thirty years.

ILEX OPACA—AMERICAN HOLLY

One year—growing in 3" pots—heavy root ball.

Each — \$1.25 3 for \$3.50

Two year—growing in 4" pots—heavy plants.

Each — \$2.25 3 for \$6.25

Beautifully foliaged male variety at same prices.

ILEX AQUIFOLIUM—ENGLISH HOLLY

Luxuriant foliage of rich green. The only hardy strain we have ever found in this locality.

One year—growing in 3" pots—heavy root ball.

Each \$1.50 3 for \$4.00

Two year—growing in 4" pots—Bushy plants.

Each \$2.50 3 for \$6.75

Beautifully foliaged male variety at same prices.

SHIPMENT TO BE MADE AT PLANTING TIME—
USUALLY IN MAY

SAMPLE OF LETTERS FROM OUR MANY SATISFIED CUSTOMERS LAND O' GOSHEN FARMS GOSHEN, KENTUCKY

The little evergreens I got from you last spring have done amazingly well, notwithstanding a long and severe drought. I watered them when I could do so, and mulched heavily. They are almost twice their original size.

Please send me the following just as soon as you can dig them.

25 Buxus m. koreana	\$4.50
25 Ilex c. convexa	\$4.50

I am enclosing my check.

Very truly yours,

WILLIAM B. BELKNAP

CARE OF YOUNG EVERGREENS

Under Three Years Old

1. Dampen plants upon arrival and place in a cool shaded area.
2. Soil Preparation — Fork over good garden soil to a depth of 8 inches and remove stone and debris. Cover with 1 inch of leaf mold or peat and mix thoroughly with upper 4 inches of soil. Add well-rotted manure and a light coating of super-phosphate. Be sure there is good drainage.
3. Planting — Space plants approximately 6 inches apart. Water thoroughly and top dress with 1 inch of peat. Rooted cuttings should be shaded the first year. This is easily done with lath, making the openings the width of a lath nailed on a light frame. Support the frame about 8 inches above the plants with stakes or build a frame around the bed. Other methods of shading may be used.
4. Summer Care — Never allow the plants to dry out. Spray with water in the evening during the hot weather.
5. Winter Care — Put leaves or other covering between plants but do not smother them. Protect the tops with evergreen boughs — Christmas tree branches are ideal.
6. Future Care — Transplant to richer soil after two years.

Prune long tips to keep plants compact.

CARE OF YOUNG AZALEAS, RHODODENDRONS AND PIERIS

1. Dampen plants upon arrival and place in a cool shaded area.
2. Cold frame or boxed in area is ideal protection while plants are young and will support shading material.
3. Soil — Must be acid. Apply 3 inches of peat and a dusting of DDT over a good garden soil and mix in thoroughly to a depth of 4 inches. If soil is heavy mix in sand. Then test with blue litmus paper and it should turn pink when placed in a damp sample of soil. If not, mix in peat until it gives this test.
4. Planting — Plant on an 8 inch square and just cover the roots, firming the plant in with the hands. Water and mulch with 1 inch of peat. Give half shade with lath or other material.
5. After Care — Protect with leaves and evergreen boughs during the Winter. No feeding is necessary the first year. The second year apply a light dressing of tankage and magnesium sulphate or prepared azalea fertilizer may be obtained. Transplant to give more room the third Spring.

Never allow the plants to dry.
